Thanks to the **XHP insulation system** and the **roof insulation kit*,** when the outside temperature is **-15°C** an internal temperature of **+20°C** is reached in **3 hours and 48 minutes****

AN OPTIMAL TEMPERATURE throughout the year

To enable you to enjoy your fitted vehicle to the full in all seasons, summer and winter alike, a roof insulation kit* is available as an option for all our models with a pop-up roof.

This high performance kit provides effective insulation to the pop-up roof, to ensure optimum use of your vehicle throughout the year, even in demanding climatic conditions.

Combined with our XHP high performance insulation and our fuel heating system, the roof canvas insulation kit considerably improves the vehicle's thermal and acoustic insulation. The XHP insulation already offers an exceptional level of insulation level, effectively limiting heat loss in winter and cooling the interior in summer.

Enjoy maximum comfort by choosing this comprehensive solution, adapted to all seasons.

** Available as an option.*
*** DREAMER insulation and heating test as per the NF EN 1646-1 standard with a WEBASTO at -15°C.*

WEIGHT REGULATIONS

IMPORTANT INFORMATION

Weight is a key consideration when choosing your recreational vehicle (motorhome or campervan), along with layout and design. Each motorhome has a maximum weight that must not be exceeded when driving. Below is some information to help you choose the right configuration, according to the weight restrictions, when selecting a new vehicle from our range.

This information is based on the definitions in the EU regulation 2021/535, Annex XIII, Section A, Part 2: Technical Specifications.

1. GVW

The Maximum Technically Permissible Laden Mass (MTPLM or M) or Gross Vehicle Weight (GVW) is stipulated by the manufacturer and corresponds to the maximum authorised mass of the vehicle while being driven (e.g. 3,500 kg or 4,400 kg). It includes the weight of the vehicle, occupants, equipment and payload capacity.

Those values are listed in the vehicle's specifications.

2. MRO

The vehicle's Mass in Running Order (MRO) includes the vehicle's bodywork, furniture, standard fittings as per the manufacturer's specifications, tanks filled to at least 90% of their capacity (fuel and liquid), and the fixed weight of the driver (75 kg). The permitted tolerance is ±5%. It is recommended that you keep that tolerance in mind while configuring your vehicle and choosing optional fittings, in order to comply with the minimum payload requirement (see point 4 below).

3. NUMBER OF PASSENGERS

The number of seats that may be occupied while driving (excluding the driver) is determined by the manufacturer on delivery according to the selected vehicle configuration and resulting payload capacity.

4. PAYLOAD

For motorhomes, European legislation requires a minimum payload equal to 10 kg multiplied by the total sum of the maximum number of passengers plus the driver plus the total length of the vehicle in metres.

For example, for a 7 metre-long motorhome with 4 driving seats (including the driver), the minimum payload would be 10 kg x (4+7) = 110 kg.

5. WEIGHT OF OPTIONS

The weights stipulated by the manufacturer for optional fittings are values determined by the model's configuration and form the maximum weight of fittings that can be ordered as optional extras. These weight limitation values are specified in order to ensure that sufficient payload capacity remains for loading the vehicle (luggage, plates and bowls, etc.).

If the total weight of selected options exceeds the maximum value set by the manufacturer, the number of driving seats will need to be reduced or optional fittings removed by the manufacturer.

Other accessories installed by the dealer or the owner are not considered original optional fittings and do not fall under the manufacturer's liability. Therefore, their weight is accounted for as part of the payload.

KEY

(d): The fuel tank can be filled to the stated maximum capacity. This increased capacity reduces the payload.

(e): 4 registered (driving) seats if HEAVY vehicle chassis

(p): Maximum number of authorised registered seats as defined by the chassis, except for 4x4 models with a GCWR

(q): Seats with seatbelts according to vehicle definition

* Polyamide-coated fabric

In addition to the 2-year contractual warranty for your vehicle and the manufacturer's warranty on original accessories installed during assembly, you are entitled to an 8-year warranty covering the watertightness and structure of the fittings, provided you have your vehicle moisture-checked annually during the 7 years following its first registration. The warranty covering all accessories installed at the dealership is provided by the original manufacturers under their terms and conditions, through the dealer or fitter. The chassis warranty is provided by the chassis manufacturer. Cost of transport is borne by the customer.

Motorhomes, campervans and vans are designed for leisure use. Under no circumstances are they intended to be used as a permanent home. Some models presented in this catalogue may be shown with optional equipment. Non-contractual photos: stylistic elements, décor and accessories not included. Since part of Dreamer production is intended for export, the characteristics of the photographed models may vary from one country to another; for an exact definition of the models marketed, please consult your dealer. Dreamer reserves the right to make any modifications to its models without notice. Despite the care taken in the production of this catalogue, it cannot be taken as a contractual document. Your dealer will be happy to give you any further information you may require. Images partly generated by AI. The vehicle fittings and furniture are from actual photos.
